

THE DENTAL COMPETITOR AD AUDIT

Use Meta Ad Library to see what other dental practices are actively advertising - then study the offer, hook, creative, and landing page before building your own campaign.

FREE TOOL

Meta Ad Library lets you search active ads by advertiser or keyword.

Go to: facebook.com/ads/library

Do not copy ads. Use the library to understand what your market is testing and how practices are positioning treatment.

HOW TO USE IT

1. Open Meta Ad Library.
2. Select the country you want to research.
3. Choose the ad category shown for regular commercial ads.
4. Search a dental practice by name - or search a treatment keyword.
5. Open the ads that catch your attention.
6. Click through to the destination page when available.

START WITH 5-10 PRACTICES

Search competitors, strong practices in other cities, DSOs, implant centers, orthodontic offices, cosmetic practices, and any brand whose marketing you respect.

WHAT TO AUDIT

Do not just look at whether the ad is pretty. Break down the business behind it.

1. THE TREATMENT

What are they actually trying to sell?

"Implants? Clear aligners? Veneers? Whitening? New-patient exams? Emergency dentistry?"

2. THE HOOK

What is the first thing the patient sees or hears?

Write the hook down exactly. Then ask: is it leading with pain, desire, price, speed, fear, convenience, proof, or curiosity?

3. THE OFFER

What makes the patient take action now?

Examples: free exam, complimentary scan, financing, limited event, bundled service, same-day option, or simply a strong educational offer.

4. THE CREATIVE

What are they using to earn attention?

Doctor talking. Before/after. Patient testimonial. Animation. Procedure footage. Stock creative. Text graphic. Office footage.

5. THE CTA

What exact action are they asking the patient to take?

Book. Call. Learn more. Send a message. Claim offer. Schedule exam.

THE PART MOST DENTISTS MISS

Click the ad.

6. THE LANDING PAGE

Where does the ad send the patient?

Look for:

- Headline
- Offer
- Doctor credibility
- Before/after cases
- Testimonials
- Financing
- FAQs
- Booking flow
- How many clicks it takes to become a lead

7. THE MESSAGE MATCH

Does the landing page continue the exact promise made in the ad?

If the ad says 'Implant Exam,' the page should immediately continue that implant conversation - not dump the patient on a generic homepage.

8. REPEATED PATTERNS

After reviewing several practices, look for patterns.

Which treatments keep showing up? Which hooks repeat? Which offers are common? Which creative styles are everywhere?

Patterns do not prove something is profitable. They tell you what the market is testing and where to investigate further.

THE 10-MINUTE COMPETITOR AUDIT

Use this every time you research a market.

Question	Your Notes
Practice / Advertiser	
Treatment being promoted	
Hook	
Patient pain or desire	
Offer	
Creative format	
CTA	
Landing page headline	
Proof used	
What I would test differently	

THE RULE

Do not copy your competitor's ad. Copy the discipline of researching before guessing.

Your goal is to understand the market, find gaps, and create a stronger angle for your own practice.

WANT MOLAR TO AUDIT YOUR MARKETING?

MOLAR helps dental practices turn patient education into practice growth through better content, stronger positioning, and consistent execution.

DM "AUDIT" and we will take a look at your page.
